Environment friendly credentials

February 2022

Timeline of our progress

November 2002

**We are ISO 14001
Certified!**

February 2013

In 2013 we installed motion sensor lighting in the production and warehouse areas to save the energy consumption due to the majority of the ground floor area not being used in the evening and night (our printroom operates 24/5)

April 2018

Solar panel installation. On average, solar energy covers 23% of our annual energy consumption

June 2019

We are FSC (Forest Stewardship Council) Certified!

The mark of responsible forestry

January 2020

From January 2020 company's corporate fleet vehicle policy requires to buy only hybrid cars. At the moment from our 11 car fleet (including 2 vans) we have 4 cars which are Hybrid (mix of full hybrids and plug in hybrids)

January 2020

At the beginning of 2020 we installed a car charging station in our car park

February 2020

In the beginning of 2020 we have started gradual replacement of regular lighting with the LED panels throughout the building to save more energy

December 2020

Our Electricity suppliers' reports show the source of the energy we are using in addition of our solar panels

Fuel mix	Coal	Gas	Nuclear	Renewable	Other	Total
Supplier till December 2020	6.3	72.0	8.2	8.3	5.2	100%
New supplier from December 2020	3	39	5	50	3	100%

December 2021

At the end of 2021 we have started gradual replacement of water taps in the toilets from manual opening/closing to push taps.

January 2022

Waste management via our supplier Veolia:

- 170 tonnes of waste paper and cardboard recycled in 2021
- Our general waste is 100% re-directed from the landfill

Annual report January 2021 – December 2021
